

Ques Merge 2 sorted LL

$t.next = h_2;$
 $t = t.next;$
 $h_2 = h_2.next;$

enqueue(int data)

rear->next = new Node(data)

rear = rear->next;

currentSize++;

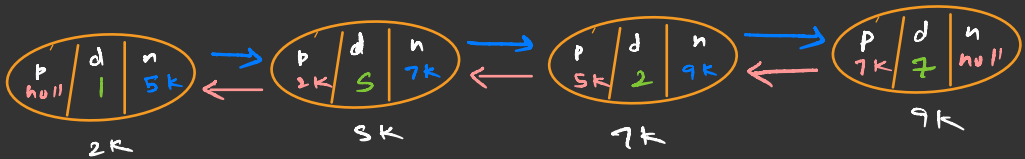

dequeue()

if (size == 0) return;

front = front.next;

size--;

Doubly LL

class Node {

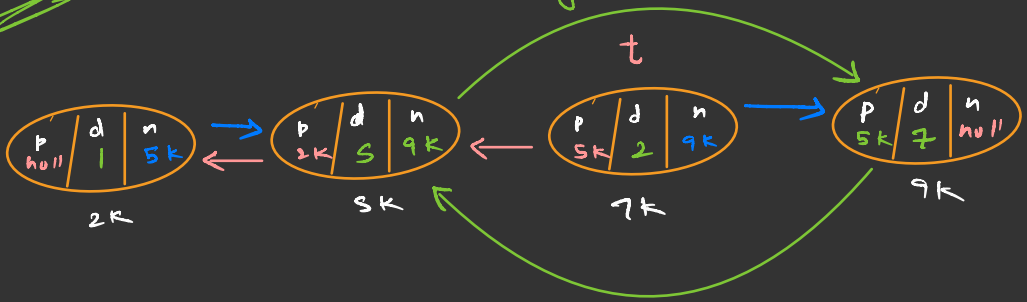

Node prev

Node next

int data

}

Ques Remove kth node from end

$t.p.n = t.n;$

$t.n.p = t.p$
